ON WALL STREET

The History

THE HISTORY OF THE BANK OF NEW YORK AT 48 WALL STREET

Founded in 1784 by Alexander Hamilton, the Bank of New York became one of America's earliest financial institutions and a cornerstone of the nation's financial system.

The 48 Wall Street building, completed in 1929, was designed as a symbol of strength, security, and innovation during one of the most significant periods in New York's financial history.

Beneath its foundation lies the original bank vault, engineered to protect the assets of generations. Today, this remarkable space opens a new chapter as an extraordinary destination for modern events.

The Space

THE SPACE

The Vault on Wall Street sits directly below the Grand Mezzanine Banking Hall and gives 48 Wall Street a versatility that most single-floor venues cannot match.

At 3,000 square feet with 14-foot ceilings, it accommodates up to 200 guests for a seated event or reception and divides into six separate breakout rooms for concurrent sessions and workshops.

For full-day conferences, the Concourse handles parallel programming while the Grand Mezzanine serves the main stage. For weddings and galas, it works as a pre-function cocktail space or a private dining room.

The two levels connect via the grand marble staircase, creating a natural and elegant flow for guests moving between them.

HISTORY. PRESTIGE. POSSIBILITIES.

The Vault on Wall Street is more than a venue. It is an experience your guests will never forget.

Host your next corporate meeting, conference, reception, production, fashion event, or holiday celebration within one of Lower Manhattan's most distinctive historic destinations.
